

No Starch Press publishes the finest in geek entertainment — distinctive books on computing, such as bestsellers *Steal This Computer Book*, *Hacking: The Art of Exploitation*, *Practical Packet Analysis*, and *The Manga Guides*. Its focus is on open source/Linux, security, hacking, programming, alternative operating systems, and science and math.

No Starch Press titles have personality and attitude, its authors are passionate about their subjects and considerable time and attention is invested in every book that bears the No Starch Press imprint. The Press makes computing accessible to a broad audience of technophiles and novices alike who appreciate unique points of view, straightforward presentation, and a fearless approach to the complex world of technology. No Starch Press books have been included in the prestigious *Communication Arts Design Annual* and STEP inside 100 competition, and have won the Ippy Award from *Independent Publisher* magazine.

San Francisco based No Starch Press was founded in 1994 by William Pollock, who brings more than 20 years of publishing industry experience to the company. Prior to launching No Starch Press, Pollock worked in professional reference, scientific, college and trade publishing, and was a co-founder of computer book publisher Apress. Pollock remains an active editor and works closely with virtually every No Starch author.
