The Oncology Nursing Society (ONS) is a professional organization of over 35,000 registered nurses and other healthcare providers dedicated to excellence in patient care, education, research, and administration in oncology nursing.

ONS traces its origin to the first National Cancer Nursing Research Conference, supported by the American Nurses Association and the American Cancer Society (ACS) in 1973. Following this conference, a small group of oncology nurses met to discuss the need for a national organization to support their profession. Since its official incorporation in 1975, ONS has become a leader in cancer care. It has grown to include 231 chapters and 27 special interest groups. It provides information and education to nurses around the world. In addition, the Society plays an active role in advocacy activities at the local, state, national and international levels.

ONS members are a diverse group of professionals who represent a variety of professional roles, practice settings and subspecialty practice areas. Registered nurses, including staff nurses, advanced practice nurses, case managers, educators, researchers, and consultants, and other healthcare professionals, benefit from membership. The Society offers useful information and opportunities for nurses at all levels, in all practice settings, and in all subspecialties.

Key focus areas:

- Blood & Marrow Stem Cell Trans
- Chemotherapy
- General Oncology
- Patient Resources
- Prevention and Detection
- Psychosocial
- Radiation
- Standards and Education
