CAS Registry Number 65017-57-4

$C_{15}H_{23}N_2$

4-Piperidinemethanamine, 1-butyl-

Molecular Weight
170.30

pKa (Predicted)
Value: 10.13±0.29 | Condition: Most Basic Temp: 25 °C

Boiling Point (Predicted)
Value: 225.1±8.0 °C | Condition: Press: 760 Torr

Density (Predicted)
Value: 0.883±0.06 g/cm³ | Condition: Temp: 20 °C Press: 760 Torr

Other Names

- 1-Butyl-4-(aminomethyl)piperidine
- 1-Butyl-4-piperidinemethanamine
- 1-Butyl-4-piperidylmethanamine
- 1-Butylpiperidin-4-ylmethanamine
- N-Butyl-4-piperidylmethanamine

Chemical structure: CCCCN1CCCCN1

CAS Index Name: 4-Piperidinemethanamine, 1-butyl-

CCCCN1CCCCC1CN

成為化學品供應商的優點

Benefit	Definition
Your company logo inserted in the SciFinder/CHEMCATS table view Key Benefit – More visibility for your substances	Every time one of your substances appears in a search for commercially-available chemicals, your logo will appear in the SciFinder/CHEMCATS table view
CAS Registry Number® service Key Benefit – Supplier can ensure that catalog substances have accurate CAS Registry Numbers	CAS will accept a computer-readable representation for each catalog substance and return the CAS Registry Number retrieved for that substance representation. You will receive a list of catalog numbers and a CAS Registry Number for each computer-readable representation that matches
Professional Services Key Benefit – Supplier can enhance the value of their substances to their customers with additional content from CAS	<ul style="list-style-type: none">• CAS Registry Number resolution – CAS staff will help resolve a substance identity issue• Assignment of new CAS Registry Numbers to your new substances• Literature references – CAS will provide literature references for your substances• CAS will provide additional substa
Featured listings Key Benefit – Supplier can ensure their substances stand out	More visibility above the SciFinder/CHEMCATS table view by featuring substances the supplier chooses (Available June 2015)

The screenshot displays the SciFinder interface for searching commercial sources. The search criteria are Substance Identifier "103-90-2" and commercial sources (724). The interface shows a list of commercial sources, with the first entry highlighted. The entry is for A Chemtek, a product list for United States, providing 4-Acetamidophenol. The interface also shows a list of commercial sources on the left, including Sigma-Aldrich, Aldrich, and SIAL.
